

14.0 MODIFICATIONS TO THE JURMP

Permit section J.1.a.(3)(m) requires identification of the location of any changes made to the JURMP to meet the requirements of Order No. R9-2007-0001. Since this document is intended as a comprehensive update to the original JURMP developed by the County in 2002, it goes beyond the types of incremental change that can be summarized in a concise way. Another factor complicating a direct comparison to the original JURMP is the considerable evolution of the County's program over the course of the last Permit cycle. Explanations of previous JURMP modifications are spread throughout several annual reports. The interested reader is referred to the individual sections of this updated JURMP, where there are clear descriptions of how the County's proposed activities, programs, and approaches comply with the minimum requirements of the new Permit.
